

Window Film Installation Technician (Commercial/Residential & Automotive)

We're looking for an experienced window film installation technician to apply high-quality window films to automotive, residential, and commercial glass. This role requires precision, patience, and a strong eye for detail. You will be responsible for prepping surfaces, cutting and applying film, and ensuring a flawless finish free of bubbles or imperfections.

The ideal candidate has experience with a variety of film types including solar, security, decorative, and automotive tint. You'll work both in-shop and on-site, delivering a professional experience that reflects our brand standards.

- a. Install a variety of window films, including solar control, privacy, safety/security, and decorative on flat glass and automotive film on vehicle windows.
- b. Prep glass surfaces by cleaning and removing any contaminants to ensure proper adhesion of film materials.
- c. Measure, cut, and apply film to glass surfaces using precision techniques to ensure a clean, bubble-free, and professional finish.
- d. Work on-site at commercial and residential properties, following project specifications and customer expectations.
- e. Apply film to automotive glass (sidelites, backglass, and windshields where legal), following vehicle-specific techniques and heat-shrinking processes as needed.
- f. Interpret blueprints, work orders, or verbal instructions to determine layout and installation approach for commercial or architectural projects.
- g. Handle film materials with care to avoid damage or contamination, and maintain inventory of tools and supplies.
- h. Maintain safety standards on job sites and while operating in-shop or mobile service environments.
- i. Communicate with customers to explain film benefits, care instructions, and aftercare best practices.
- j. Stay current on new film technologies, installation techniques, and industry regulations (e.g., tint laws).
